Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on February 3, is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner. However, in reference to International Search Report and written opinion cited in other art that report is considered to be a correspondence and not a prior art document it has been lined out by examiner. The information referred to therein has been fully considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Reddy

US006769418B1. Reddy discloses a method for controlling engine start-up,

Art Unit: 3747

comprising: providing fuel using a fuel tank (20) and in which at least a majority of said fuel is fuel vapor; and supplying at least some of said fuel vapor obtained during said providing to the engine, wherein said fuel vapor from said supplying is the only fuel vapor used during said engine start-up. Tank (20) holds liquid fuel and it's vapor the only source of fuel for the engine start-up and for engine operation other than start-up and device (50) creates a negative pressure. Fuel vapor is created and provided at ambient temperatures. It is inherent that small quantities of vapor will condense as ambient conditions are cold when the vapor is passed through valve 64 adjacent device (50). Refer to drawing 2 and column 3 line 24 through column 4 line 10.
